The ATH©

[The Advanced Time Healing](#), is a strong and powerful methodology, in NLP, The New Generation.

Psychologists now have the perfect setup to create an immediate diversion in people's lives. The change is positive and immediate.

People usually suffer from the way they feel towards something. Those feelings are the result of accumulative events that happened in the past.

Unfortunately, people forget to focus on the event that happened and focus on the feelings that are consciously appearing now in the present.

The feelings will take over the full attention of the sufferer, while the attention and the focus should be somewhere else. The source.

The PTSD is the result of a trauma, and the trauma is the result of an event. This is not even the source.

The SOURCE is a combination between (what I know, what I am witnessing, during a certain time, that creates a perception we call experience, this experience will start to create the feelings).

The ATH© is delivering today the right tool to therapists, to delve inside the brain and reprogram the event to break the **BOND** (TIME PERCEPTION- AGE- LEARNING - PATTERN - FEELING - BEHAVIOR).

With the ATH© you will be able to understand and work to heal the **BOND**.

Each event has its own characteristics and there are many. Different people use different characteristics. That's why we have different feelings towards the same event.

Each event is happening through time, at a certain age.

Each age has its own ability to comprehend. That's what we call knowledge.

The knowledge will create LEARNINGS.

The Learnings will create feelings.

The repetition of the same feeling will create a behavior that becomes a habit.
The habit will live with people forever.

1-The **BOND**

The ATH© is designed especially to separate the BOND elements from each other, dealing with each element aside, discharging the feelings already stored at a certain age, release the pressure from the present, creating new knowledge of the event, witnessing something new, during the original time, creating a new perception, which leads to a new experience. The feelings become different.

The [ATH© is a methodology](#) that leads therapists, step by step, to access, detect, understand, pull out, reprogram, insert, fix and test events and feelings stored in the subconscious.

This process is a deep cleaning of all the residues that are creating unwanted feelings.

Unfortunately, people know what they don't want, they know exactly what they are running away from and they can describe it in great detail, yet they are not aware about what they really want to achieve. They know what they want to be rid of, but not what they want to replace it with, or the new behavior they would like to acquire.

People always want to be safe because they don't want to feel danger. They want money because they don't want to be poor. They want health because they don't want to be ill. Everything we need in life just because we are running away from something else.

That's what we call the **DIRECTION**.

2- The DIRECTION

The ATH© is [offering Psychologists](#) and therapists the power to help others change their DIRECTION. ATH© delivers techniques to create awareness, it is a wake-up call to go the opposite direction.

Most of the time people move in a random direction, the ATH© points to the right direction to achieve the required results.

The ATH© is setting a protocol to move through time. Our time is continuous, it starts months before we were born and ends by death. In between a whole life is being coded and it all exists inside our brain.

The brain. It is small enough to be held on our shoulders yet large enough to be undiscovered and mysterious. Till now we are still unable to understand what's going on inside our subconscious mind. Scientists, psychologists, and therapists are, till now, trying to understand how the brain works.

Well the ATH©, is delivering today a step further into the functionality of the brain. There is a famous proverb “Necessity is the mother of invention”.

We needed to find a solution to severe PTSD cases caused by war, and we succeeded.

This enriched the ATH© experience and gave it a huge push into understanding the functionality of the brain and how PTSD was created in the first place. And that’s what we call ‘how the BRAIN works’.

3- How the BRAIN works

It has always been a fight between the conscious and the subconscious mind, or at least that's what we have been taught.

The conscious mind is asking for the change, the subconscious mind is resisting the change. That's why people's lives are not easy.

The ATH©, helped to find a new discovery. We were focusing all our efforts on the subconscious mind to insert the change. Well, the part to be blamed for the resistance is for sure not the subconscious mind, after all, it is only the HOST.

4- The HOST

The ATH©, opened the door to therapists to see and understand, that the subconscious mind is really willing to change. It needs it, wants it, and works for it.

The HOST is our best friend. It is the best gift in our creation. The change process needs to happen somewhere else. You start and the HOST will just help you to accomplish the change.

[Register now](#), and discover the power of the ATH©.

Boost your knowledge remarkably. The ATH© will open a new world in front of you. The experience is unique.

You are making the right step by registering now and getting the [20% discount coupon](#). It is amazing how much you can save when you register yourself for the special [NLP live online training for psychologists](#).
